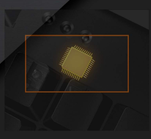
TK50

MECHANICAL GAMING KEYBOARD

GAMING REVOLUTION

ADVANCED TECHNOLOGY

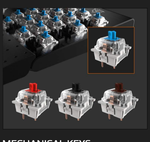


THE CORE

Housed with Holtek MT66FB560 MCU, TK50 operates in high performance while achieving very low power consumption. TK50 is a great solution to gaming with great value.

POLLING RATE

With 1000hz, TK50 offers the highest possible polling rate in the market today, which means is a merely just 1/1000th of a second of communication between TK50 and the computer. This is definitely fast and accurate especially during gamming sessions.



MECHANICAL KEYS

TK50 is equipped with the mechanical switches manufactured with good balance and rebound and can withistand heavy key presses.
Most importantly, the switch casing is made out of transparent plastic with LED positioned in the center to ensure that the light is shined evenly onto the text/icon.

UNMATCHED PERFORMANCE

ANTI-GHOSTING

Imagine playing your favorite video game and not being able to, say, run diagonally and fire your weapon at the same time! (say pressing a, w, and q simultaneously)! TK50 offers 26-key-press anti-ghosting ability which means you are totally free at your games!

HIGH-DURABILITY

The actuation physical switches underneath the keys of TK50 have high-durability that was tested for up to 20 million key presses/. The switches last longer than the typical 1 to 5 million presses for most rubber-dome keyboards.

ANTI-SLIP FEET

Sometimes when the fight is getting too intense during game play, it is a good thing that the base of the keyboard is installed with the slippery-proof rubber pads to keep your keyboard right where you want it.

UNPARELLELED DESIGN

ALUMINUM TOP

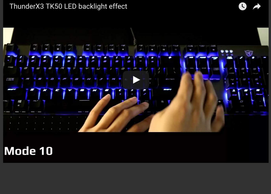
The top casing of this keyboard is manufactured with the brush aluminum of 0.7mm thickness which is both durable and adds to its aesthetic look.

MEDIA KEYS

Media keys give you quick access and control to your favorite sound tracks and movies and the keys are located conveniently at the top of the keyboard.

BACKLIT PULSATING SPEED

With this function key, you can have fun adjusting the LED pulsating speed from slow to fast for all of the 12 backlit modes.



12 BACKLIGHT MODES

TK50 is pre-programmed with twelve sets of very cool lighting modes.

You can change the modes anytime even during gamming sessions.

TECH SPECS

Model Name	TK50
Key switch	Blue / Black / Brown / Red key Switch
N-key rollover	26
Full key backlight	Yes
Game type	FPS / MMORPG / MOBA / RTS
Material	Aluminum / Plastic
Interface	Gold-plated USB Plug
Cable Length	1.8m Braided
Dimension	195(D) x 442(W) x 37(H) mm
Weight	1.0kg ± 10g
Fitting	Detachable Wrist Rest
