

# TMP30

MOUSE PAD FOR hardcore GAMERS

GAMING REVOLUTION

## TOTAL CONTROL

### CONTROL-ORIENTED

Control-oriented mouse pads have rough surfaces to create a sensation of resistance to your mouse movements. The friction of the textured surface offsets the energy you exert to move the mouse, ensuring precise minute movements. TMP30 suits gamers who need absolute precision to hit targets exactly where they need to.

### THE BASE

The base is made of anti-slip rubber of 4mm thickness to make sure the pad to stay where they should be during vicious game situations.

### HIGH PERFORMANCE

This gaming grade mouse pad was designed for precision and tracking quality for both optical and laser mice.

## TECH SPECS

Model Name	TMP30
Model	Control type
Width (mm)	400
Length (mm)	320
Thickness (mm)	4
Surface material	Polyester fabric
Surface color	Black
Base material	Natural rubber
